89'4" Tri Level Autorack

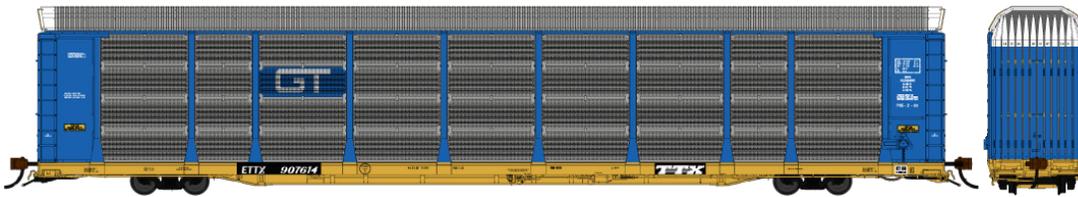

MSRP: CDN \$124.99 US: \$95.99

Purchase 4 or more cars and get 10% off

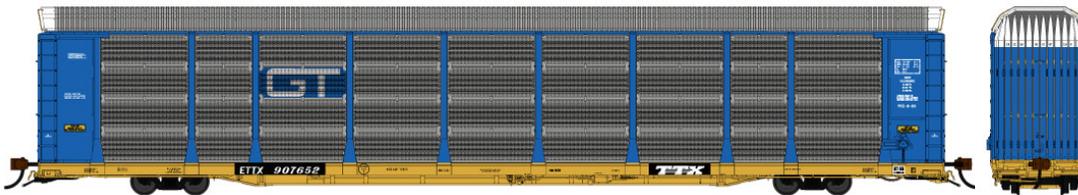

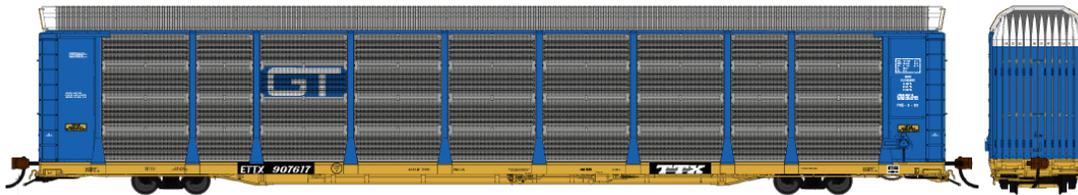

Between 1981 and 1985, Portec's latest fully enclosed rack design was being implemented into the wide-body, low-level, flush deck rebuild program. The Portec design included a full side, end, and roof enclosure with patented RAVE (Rack Anti-Vandal Enclosure) doors. These racks would be mounted to Pullman Standard and ACF F-89 flat cars. There were various F-89 flat cars including the F89-WHW, F89-CHW, and the PLH10W/11W/15W versions. The first production run of our tri level autoracks feature the Portec rack bodies with RAVE1 (ski slope) doors mounted to both NSC and P-S F89 flat cars.

Our Autoracks Feature:

- Prototypically accurate rack bodies designed from field measurements and blueprints.
- Prototypically accurate P-S F89CHW, F89WHW and PLH10W flat car bodies, designed from field measurements and blueprints.
- Equipped with RAVE Type 1 Doors.
- Photo-etched side screen panels.
- Equipped with Ride Control D4 Low-Level Trucks.
- Equipped with 28" CNC machined wheels.
- Equipped with Kadee long shank couplers.
- Separately applied metal grab irons.
- Fully detailed underframe and brake rigging details.
